

THE ULTIMATE FOREX TRADING TECHNIQUES

ITEM #1

The Triangle Pattern

I get better results with the triangle pattern than with any sophisticated trading system I have ever tried. It's extremely simple to use, and it's one of those rare strategies that gives you exact targets. [Click here for more info.](#)

ITEM #2

Channels

Combined with the triangle pattern, good ol' channels cover 80% of market situations. I use channels almost all the time. Experiment with other stuff, but become a pro at channels and you will always have a reliable strategy at your disposal. [Click here for more info.](#)

ITEM #3

Fibonacci Retracements

Fibo retracements are by far the most intriguing technique in Forex. Nobody knows why they work, but they work. And that's all that matters. Very useful for setting your StopLoss and TakeProfit targets. [Click here for more info.](#)

ITEM #4

Forex Timezone Map

This is, hands down, one of the most useful tools. Forex currencies behave differently depending on which geography is most active. This timezone map puts you at a great advantage by telling you exactly which region is dominating the market right now. [Click here to get your timezone map completely FREE.](#)

ITEM #5

Harmonic Patterns

A more advanced technique and a great way to spice things up. Harmonic patterns are based on Fibonacci levels. They represent an extremely powerful tool for predicting reversals in the market. [Click here for more info.](#)
